

Grade Book Database ER Diagram

Explanation

This ER diagram represents a grade book database. The main entities are:

- **Student**: stores student information.
- **Instructor**: stores instructor information.
- **Course**: stores course information and links each course to an instructor.
- **Assignment**: stores assignments for each course.
- **Grade**: stores student scores for assignments.

The relationships are:

- One student can have many grades.
- One assignment can have many grades.
- One course can have many assignments.
- One instructor can teach many courses.
